

## Rinse Free Shampoo Caps

### *What does a Shampoo Cap do?*

Coated with a special hair-moisturising lotion on the inside of the cap, hair is shampooed and conditioned, without the need for rinsing! The result? Clean and fresh hair that takes 75% less time to achieve than traditional methods of washing!

### **How to use the Shampoo Cap?**

Place the cap on the patient's head, make sure that all hair is inside the cap and then gently massage the cap. Apply to the hair and thoroughly saturate. Process for 5-10 minutes. Remove the cap, dry lose hair with dry wipe and style.

### **Do Shampoo caps help hair?**

If there is too much moisture in the air, then your hair will get frizzy. That's why you should place a shower cap over your hair. It can keep your hair in place and if you get a cotton-lined one, it can act as a barrier against moisture and humidity.

### **Ingredients:**

It contains Water, Aloe vera extract, Glycerine, Phenoxyethanol and Ethylhexylglycerine, Tocopheryl Acetate, Disodium Cocoamthodiacetate, Perfume

### **Pack Size:**
